## SYSTEM DESCALER AND CLEANING TREATMENT #SSC-6126

### Clean and Descale all-in-one step

Scale, corrosion, mineral deposits, iron, hard water, and rust can do damage to your water treatment systems. These are just a few of the things that SSC takes care of. And the really good news is that SSC is safe to use on ferrous and non-ferrous metals because it does not contain harmful acids like hydrochloric, phosphoric, sulfuric or citric acids.

### SSC-6126 Benefits:

- Variable dilution - can be applied at concentrations ranging from 5-25% of system volume depending on the deposit encountered and the cleaning temperature
- Easy to apply
- Contains special corrosion control agents
- Ships as a non-regulated product
