Creative Solutions for Water Management

greensense technologies

- ✓ Environmentally responsible
- ✓ Safer
- ✓ Non-Regulated
- ✓ Cost effective

greensense technologies based products are engineered to meet the criterion of safer non-regulated based materials, greater bio-degradability, bio-renewability whenever possible and formulation ingredients have to maintain a healthy degree of economic sense/cents.

greensense technologies reagents function the same way and with the same amounts as the traditional reagent while providing the same values as the traditional reagents.

Take Advantage of *greensense technologies* Non-Regulated Reagents

- ✓ NO UPS or other small package carrier hazardous materials contracts
- ✓ NO extra packaging costs for cartons & absorbents to meet DOT requirements for packaging & shipping of hazardous materials!
- ✓ NO certified hazardous materials training for re-shippers, a legal requirement by DOT!
- ✓ NO worries about the potential of hazardous materials leaking in transit!
- ✓ NO issues of consumers handling corrosive materials!

PLUS, everyone gains from the real benefits of *greensense technologies* based materials being less toxic to the user and the environment.
